

## **REPRESENTATIVE TECHNOLOGIES**

<b>Number</b>	<b>Title</b>
5,975,208	Method and apparatus for deploying a well tool into a lateral wellbore
6,059,622	Method and system for manufacturing a photocathode
6,100,828	Analog-to-digital converter test system and method
6,138,581	Railway gondola car
6,145,687	Contaminant plug for medical instrument sterilization containers
6,196,414	Fastener injector system and method
6,217,636	Transpired wall aerosol collection system and method
6,230,382	System and method for assembling an aircraft
6,258,017	System and method for producing folded articles
6,264,063	Orientation maintained fastener delivery system and method
6,264,186	Top load threaded bolt assembly
6,266,142	Noncontact position and orientation measurement system and method
6,293,813	Electrical connector with latching backplate assembly
6,295,805	Exhaust induced ejector nozzle system and method
6,296,547	Method and system for manufacturing a photocathode
6,317,954	System and method for aligning aircraft coordinate systems
6,330,168	Card shelf cable management system and method
6,341,282	Information retrieval system and method
6,359,565	Method and system for monitoring the thermal status of a card shelf
6,385,946	System and method for producing folded articles
6,388,246	System and method for detecting underwater objects having a shifted frequency
6,396,049	Microchannel plate having an enhanced coating
6,425,547	System and method for producing coreless fabric rolls
6,440,264	Method and system for manufacturing a photocathode
6,445,793	Adjustable telephone system and method
6,470,228	Material management system and method
6,484,381	System and method for aligning aircraft coordinate systems
6,510,414	Speech recognition assisted data entry system and method
6,511,061	Fastener injector system and method
6,511,777	Method for manufacturing a phase shift photomask
6,531,691	Method and system for optically testing a detector
6,551,162	Method for manufacturing a photocathode
6,566,644	Optical fiber sorter system and method
6,575,041	Capacitive strain gage and method
6,591,006	Intelligent image recording system and method
6,596,584	Method for fabricating a self-aligned source line flash memory device
6,603,586	System and method supporting optical communications
6,626,684	Nanotube socket system and method
6,662,870	Method and system for accessing subterranean deposits from a limited surface area
6,677,232	Method for fabricating metal conductors and multi-level interconnects in a semiconductor device
6,692,209	Method and system for manufacturing a photocathode
6,708,071	Method and system for defining and verifying a part
6,711,257	Telephone indicator system and method
6,724,047	Body contact silicon-on-insulator transistor and method
6,743,074	Method and system for manufacturing a photocathode

6,797,172	Degumming of edible oils by ultrafiltration
6,808,478	System and method for producing folded articles
6,958,916	Rackmount computer system and method
6,996,508	System and method for remote retrofit identification of energy consumption systems and components
7,030,876	System and method for three-dimensional imaging
7,035,434	Hough transform based motion detection image recording system and method
7,100,036	System and method for securing a computer
7,181,418	Internet customer service method and system
7,296,084	Data management system and method
7,381,096	Media power protection system and method
7,447,824	Dynamic lane management system and method
7,452,225	Computer device with retractable connector
7,466,306	Multi-display computer system and method
7,500,090	Operating environment configuration system and method
7,502,225	Portable computer docking station
7,515,405	Anti-rotation mechanism for an electronic device
7,518,336	Battery pack event-proof monitoring and analysis system and method
7,532,801	Imaging device illumination system
7,540,748	Flexible I/O connection system and method
7,542,290	Computer device cooling system
7,543,807	Imaging system and method
7,549,892	Electronic device connector system
7,555,642	Media transfer system and method
7,558,227	System and method for monitoring for wake events in a wireless local area network
7,564,412	Antenna grounding system and method
7,566,238	Card connector dampening assembly
7,568,225	System and method for remote security enablement
7,570,397	Imaging system and method to enable scanning a variety of types of media objects
7,581,111	System, method and apparatus for transparently granting access to a selected device using an automatically generated credential
7,581,130	Power management system and method
7,589,647	Computing device antenna identification system and method
7,590,909	In-circuit testing system and method
7,598,702	Power management system and method for controlling use of power-consuming applications
7,605,565	Battery pack with protection circuit
7,626,739	Imaging using media carriage coupled to a lid
7,641,362	Electronic device lighting system
7,644,222	Low latency event communication system and method
7,648,122	Line retrieval system and method
7,652,801	Duplex detection imaging system and method
7,677,811	Lightpipe mounting assembly and method
7,680,961	Device recognition system and method
7,689,851	Limiting power state changes to a processor of a computer device
7,694,120	Pin strap setting override system and method
7,706,018	Image enhancement system and method
7,707,461	Digital media drive failure prediction system and method
7,708,240	Computer docking system

7,711,942	Computer security system and method
7,717,374	Keyboard palm rest assembly
7,730,293	Hard disk drive self-test system and method
7,755,836	Imaging system and method to change field depth
7,760,207	Image display adjustment system and method
7,771,099	Electronic device with backlit display
7,800,893	Display stabilization system
7,803,206	Electronic device filter assembly
7,825,913	Computer stylus with integrated memory
7,830,560	System and method for adaptive digital ramp current control
7,831,785	Data collection management system and method
7,881,682	System and method for configuring a wireless module power limit
7,917,750	Virtual user authentication system and method
7,924,742	Network device discovery system and method
7,928,966	Computer input pen apparatus
7,934,107	Power management system and method
7,952,328	Multi-battery charging system and method
7,959,198	Magnetic line retrieval system and method
7,986,328	Graphics optimization system and method
7,991,244	Variable skew correction system and method
7,992,028	Power management for correlating difference in system power measurements with subsystem power draw
8,000,099	Power supply cooling system
8,004,530	Video controller switching system and method
8,018,607	Scanner power management system and method
8,028,165	Trusted platform field upgrade system and method
8,054,047	Battery pack charging system and method
8,060,629	System and method for managing information requests
8,065,509	Persistent security system and method
8,068,172	Image aspect ratio adjustment system and method
8,082,551	System and method for sharing a trusted platform module
8,086,900	System, method and computer program product for testing a boot image
8,087,643	Line retrieval system and method
8,117,450	System and method for secure data transmission
8,126,141	Interferometric communication
8,157,244	Line retrieval system and method
8,172,282	Computing device latching assembly
8,117,450	System and method for secure data transmission
8,131,903	Multi-channel memory connection system and method
8,186,650	Line retrieval system and method
2003/0236800	Dynamic recovery system and method
2004/0107319	Cache management system and method
2004/0249616	Resource modeler system and method
2005/0096840	Navigation routing system and method
2005/0177724	Authentication system and method
2005/0182945	Computer security system and method
2005/0251561	Computer-readable medium, method and computer system for accessing a networked peripheral device
2005/0267722	Computer-assisted external fixation apparatus and method
2006/0080584	Built-in self-test system and method for an integrated circuit
2006/0136835	Computer display control system and method

2006/0259782	Computer security system and method
2006/0268377	Imaging system and method
2007/0033460	System and method for scan testing
2007/0038223	Computer-assisted knee replacement apparatus and method
2007/0075988	Computer device with digitizer calibration system and method
2007/0079042	Portable computer docking server system
2007/0085822	Wireless transmitter enabling/disabling system
2007/0092080	Wireless communications validation system and method
2007/0093979	Computer device configuration system and method
2007/0094423	Device recognition system and method
2007/0094435	Computer docking system and method
2007/0096689	Battery analysis system and method
2007/0130378	Computer protection system and method
2009/0112461	Mapping system
2009/0159715	Vortex-based temperature control system and method
2010/0223469	Method, system and computer program product for certifying software origination
2010/0153184	System, method and computer program product for predicting customer behavior
2011/0118822	Stent and method for manufacturing thereof
2011/0153306	System, method and computer program product for processor verification using abstract test case
2011/0154352	Memory management system, method and computer program product
2011/0232867	System, method and computer program product for energy allocation
2011/0289270	System, method and computer program product for data transfer management
2012/0054374	System, method and computer program product for monitoring memory access
2012/0054375	System, method and computer program product for monitoring memory access
2012/0096457	System, method and computer program product for preprovisioning virtual machines
2012/0114010	System, method and computer program product for monitoring temperature
2012/0115493	System, method and computer program product for supporting multiple subscriber identities in a portable device using a single transceiver
2012/0124299	System, method and computer program product for extending a cache using processor registers
